A success with day one of TML... lots of meetings... discussions... and vendor visits to find innovative solutions to bring things back to the city that can impact great change...

Being focused on roads... they have so many options that can bring better patch repair and other solutions to areas of concern...

Many other vendors with kiosk options for when the ERP program is fully operational and the city takes on billing...

We are in a divide and conquer mindset here to gain valuable information...

Let's keep MC moving and becoming a city that has the protection of the look, feel and vibe we have come to love... but with incorporating smart growth and development that gives us options that make our lives easier...

So much is shaping in the Commercial Corridor and the shops and retail that is coming will help us with sales tax dollars to do well for MC...

Excited to see the MC direction that remains positive and has a bright future!!!!

When Council Members and the Mayor work together for a common goal...

To serve citizens and take action on things that benefit the city... through roads... smart growth... smart development and more...

We can shape and forge ahead on things that matter... but most of all...

We have stopped division on council... we have ended lawsuits... we have started massive road repair plans with partnerships... we are moving forward in a positive direction on so much...

So proud to be apart of this group of individuals...

Quick lunch break from TML... as we are here gathering information and attending classes to make our city better...
